

**All Services  
ONE Entrance!**

You will now be able to access all our Products and Services in one location!

**FIELD SERVICES:**

- ✓ Generator Maintenance
- ✓ Vibration Analysis
- ✓ Laser Alignment
- ✓ Thermography
- ✓ Oil Analysis

When evaluating and selecting your motor service centre, make sure it compares with GPR:

- ✓ Electrical, mechanical and machining capabilities;
- ✓ Lifting equipment (*ten ton cranes and forklifts*);
- ✓ Recognized varnish impregnation system;
- ✓ Efficient repair procedure;
- ✓ Quality Assurance (*ISO, CSA, Explosion proof/hazardous location, Cantech certification*);
- ✓ Efficient Programs such as documentation, recommended practices, communication, organization and safety;
- ✓ Financial stability, insurance and WCB coverage;
- ✓ Apprenticeship and manufacturer trained technicians;
- ✓ Sales, service and warranty requirements;
- ✓ Vibration analysis, infrared thermal imaging, winding analysis, and laser aligning services;
- ✓ Recommendations on repair vs replacement;
- ✓ Calibrated test equipment, load banks and rated voltage running capabilities.

*The time to repair the roof is when the sun is shining!* ~ John F. Kennedy

**Complete Repair of Rotating Apparatus**

GPR has further developed our commitment on what we consider a Complete Electric Motor Repair. In the past, when the motor has passed the critical quality assurance, electrical and mechanical tests on our test bed, in most cases we were done with it. GPR takes the Recommended Practice for the repair of rotating electrical apparatus a step further. We are now offering you the comfort of knowing your equipment has been transported, handled with care and professionally installed and aligned.

Trained technicians, state of the art tools and ISO certified calibrated instruments will guarantee the quality and care required to extend the life and efficiency of your critical rotating equipment.
