GENERATOR SERVICE AGREEMENT

GPR Industries (1994) Ltd. is a leader in the electro mechanical service field and has been providing flexible customer service for the last 43 years. We are pleased to offer Power Generation Service Contracts to ensure you and your equipment are in top condition. GPR's qualified technicians will be dispatched to your site to carefully inspect your electro-mechanical equipment.

We provide expert, continual service that will help lower your maintenance and utility costs and help eliminate possible costly and annoying downtime.

Starting now, GPR is pleased to offer the following:

EQUIPMENT CHECKLIST:

Preventative maintenance program checklist for as low as \$99.00/unit.

- PM Checklists are completed by a qualified GPR technician on your site documenting equipment data and offering recommendations about the equipment. (checklist attached)

EQUIPMENT SERVICE:

Preventative Maintenance Program:

Commercial Generator Service

Industrial Generator Service

- Qualified Journeyman will complete the generator service using recommendations gathered from the Generator Checklist,
- An accurate service contract will be developed based upon the requirements of the equipment based on the gathered information and service. GPR will maintain records of your equipment and provide written recommendations on future repairs and recommend/implement corrective actions for any deficiencies found.

CONDITIONS:

Reports: An inspection report will be supplied by GPR detailing condition of the unit and advising further service requirements. Warranties are contingent upon recommendations being implemented. All parts and labour for supplementary service will be charged as an extra at current charge out rates.

Invoicing: GPR will invoice each maintenance visit and any emergency service immediately after service.

Terms: To ensure proper maintenance and load testing, the minimum service contract term is 24 months. Cancellation by either party at any time requires 30-day written notice.

After Hours: Normal overtime labour rates apply to any after-hours testing of emergency power systems outside regular business hours.
